

ASHENAFI GEBREYESUS

BACKEND ENGINEERING & APPLIED AI

Charlotte, NC | [linkedin.com/in/ashenafi-gebreyesus](https://www.linkedin.com/in/ashenafi-gebreyesus)

Software engineer building backend services and practical AI applications. Experience spans delivery and customer promise systems, Java and Spring Boot microservices, cloud deployment, machine learning, and optical character recognition.

CORE TECHNOLOGIES

Backend: Java, Python, Spring Boot, Spring Security, Django, REST APIs, Kafka

Data: PostgreSQL, Cassandra, Couchbase, MySQL, MongoDB, DynamoDB

Cloud & delivery: GCP, AWS, Docker, Kubernetes, Jenkins, Spinnaker, GitHub Actions

AI & ML: TensorFlow, Keras, scikit-learn, SageMaker, OpenCV, Tesseract OCR

PROFESSIONAL EXPERIENCE

Lowe's | Software Engineer | May 2023 - Present

Charlotte, NC - Delivery and Customer Promise team

Develop Java and Spring Boot services for product delivery and tracking. Build microservices for on-premises and cloud environments; support legacy application migration, troubleshooting, and upgrades. Design, optimize, and maintain databases integrated with software systems.

Stack: Java, Spring Boot, Cassandra, PostgreSQL, Couchbase, GCP, Spinnaker, Jenkins.

ELSE CORP | DevOps / AWS Cloud Engineer | 2021 - 2022

Milan, Italy - E-commerce and cloud manufacturing

Developed services in Python, Java, and C++; built microservices with Spring Boot and Django. Integrated software components and third-party programs, supported project workflow software, and improved legacy applications.

Stack: Java, Python, C++, Linux, Amazon SageMaker, Lambda, ECS.

ELSE CORP | Software Engineer | 2020 - 2021

Developed machine learning and deep learning models using Amazon SageMaker and backend microservices with Django. Built user interfaces, conducted unit and integration testing, implemented CI/CD, and supported cloud infrastructure provisioning and deployment.

Stack: Python, Django, NGINX, Docker, AWS, DynamoDB, Fargate, CloudFormation, Lambda.

ASHENAFI GEBREYESUS

EXPERIENCE, PROJECTS & EDUCATION

UniCredit Services | Data Scientist | 2019 - 2020

Milan, Italy - Requirements analysis, algorithm development, and unit and integration testing for data-focused systems. Technologies included Python, Tesseract OCR, OpenCV, TensorFlow, Docker, and Kubernetes.

Mekelle University | Software Developer | 2015 - 2017

Developed and maintained software for academic institutions. Worked on requirements, documentation, validation, algorithms, component integration, and testing using Java, Spring, Hibernate, Tomcat, and MySQL.

SELECTED PROJECTS

Online Shopping Cart | MIU | 2022

Academic project supporting catalog browsing, purchases, order history, checkout, and a persistent cart. Integrated banking web services and used Jess for business rules and validation. Stack: Spring, Hibernate, Spring Security, MySQL, Jess.

Online Auction System | MIU | 2022

Academic event-based platform for real-time auctions. Stack: Java, Spring Boot, React, Kafka, Zipkin, Spring Config, MongoDB, PostgreSQL, Docker, GitHub Actions.

AI-Based Optical Character Recognition | Polytechnic of Milan | 2021

Academic application for extracting text from images using Python, Tesseract, Docker, and Git.

EDUCATION

M.S. Computer Science - Maharishi International University, 2024

Coursework: Java programming, web applications, enterprise architecture, algorithms.

M.S. Computer Science - Polytechnic of Milan

Coursework: machine learning, deep learning, advanced databases, software engineering, IoT.

B.Sc. Computer Science and Engineering - Mekelle University, 2015

PROFESSIONAL DEVELOPMENT

Learning TensorFlow with JavaScript - LinkedIn Learning

AWS Fundamentals: Building Serverless Applications - Coursera

Docker Essentials: A Developer Introduction - Cognitive Class
